Accommodation, during staying

During staying anyway is very important to keep in a good condition the apartment.

Is possible to do separate collection of rubbish, in the figure above you can find all details to do it. About collection of plastic and paper is possible to leave it out of the accommodation the night before the day of collection.

Sea sand, during staying

One the most problems during staying is sea sand not only for the accommodation but also like environment impact, if considering the high amount take off from beaches any year. Considering this we would advise all our guest to clean up it directly on the beaches, if this would be not possible, please when in the apartment clean it on the out space (terrace, veranda) available. But make sure to leave

Bus lines and tickets

The city has different urban lines: Line AP, AO, AF, AC, ticket price is 0,90 euro, you can buy tickets on all authorized shops like: newsagent, tobacconist present in many points in the city. AA line is the Alghero-Airport line, on this case the price is 1 euro and you can have the directly service to the airport.

About Extra urban lines the main company is ARST, is possible to find details about directly on their website
